Checklist: Getting ready for your first day

Double check your schedule - pay attention to whether the classroom locations have changed!

Go to your online class management system to **see if syllabi have posted**. If they have, read them and download them... create a folder for each course. (This is so if the internet goes down you still will have access to your syllabi!)

Check your routes - make sure you've estimated how much time it will take you to get to places on campus and download the campus map to your phone!

Pack your school bag - be sure to include things like laptop and chargers, notebooks and pen/pencil, water bottle, and maybe an extra phone charger just in case!

Set your alarm - set more than one if you need to! Being late or missing class on your first day will put you at a disadvantage.
